

### Assembly

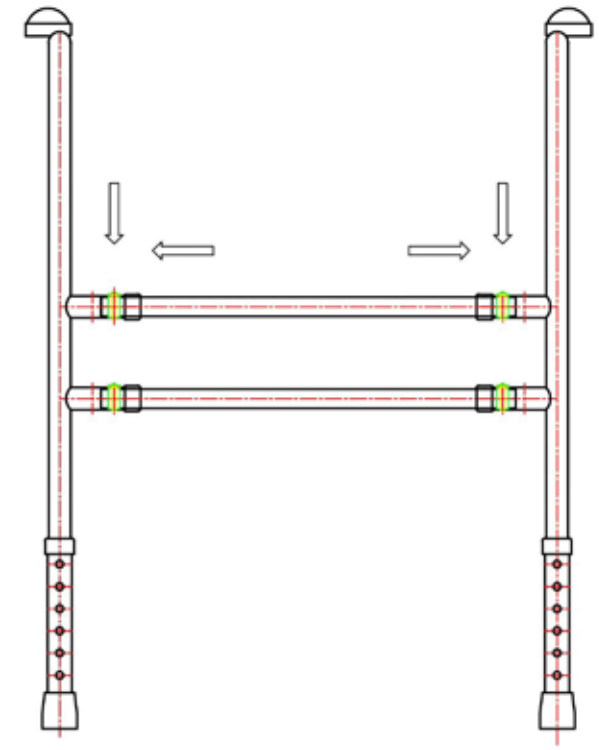

1.

Remove all outer packaging and lay items out in a clear area ready for assembly.

2.

Connect the two frame sides together with the connecting tubes, insert included c-clip to secure together. The frame is width adjustable, to adjust push the connecting tube further into the frame and secure with clip.

3.

Once the frame is fully assembled with all four c-clips in the connecting tubes, you can adjust the c-clips on the legs to raise or lower the height of the frame.
